• CODE METRIC (3 YEARS)

TRICHY, SYSTEM ENGINEER, **PRESENT.**

PROJECTS

TASK MASTER

TASK MANAGEMENT TOOL

Taskmaster is a scalable, enterprise-grade project and task management platform that boosts team productivity and transparency. It offers role-based access control, real-time collaboration via **Django** Channels, interactive **React** dashboards, and integrated task tracking to streamline workflows and monitor progress. With built-in notifications and comprehensive **RESTful API** support, Taskmaster ensures efficient communication and smooth coordination in dynamic work environments.

COLLAB CHAT

Modular Architecture for Scalable Team Collaboration Platforms

Built **RESTful APIs** for user accounts, chat, meetings, and third-party integrations (**Zoom/WebRTC**).

Enabled real-time chat and video conferencing.

Secured access with role-based authentication.

Integrated secure document sharing with version control.

Delivered real-time notifications for chats, meetings, and reminders.

Ensured data privacy compliance (**GDPR, HIPAA**) with robust security modules.
